Reduce TCO by 2X	Increase Productivity by 3X	Increase User Experience by 2X
-------------------------	------------------------------------	---------------------------------------

In today's enterprise world, the role of IT is not restricted to only managing assets and services. The Age of Digitization has transformed the customers 'mind-set to seek solutions that exceed expectation and are available on demand. The challenges for the customer is to increase the Quality, Experience and Time to Market at a reduced cost.

IMS Solutions for the New World

KPIT helps build and manage highly available and outcome based reliable IT infrastructure that is at par with dynamic business objectives such as agility, cost optimization, enhanced user experience, and compliance. We deliver NextGen infrastructure services by leveraging our expertise and bringing in the benefits of emerging technologies like Hyper-convergence, Hybrid Platform, Test Environment-on-demand, and Integrated Run.

IMS Service Offerings

Our comprehensive spectrum of Operational and Transformation Services is delivered through our Global Delivery Model. The solutions are customized to help build a viable operational solution that best fits a company's innate business needs, consistently and seamlessly across offshore, near-shore, and onshore locations. We help exceed customer service level agreements (SLAs) by adopting ITIL industry standard best practices. The IMS service offerings are powered by the iSight Platform which enables:-

- Simplified Orchestration and Integration with a choice of Hybrid IT services
- Operation Management and Analytics based reporting to deliver Hybrid IT services with IT Service Management integration
- Dynamic Workload Optimization and Forecast capability across multiple public and private cloud resources
