

Accounts Payable Process Automation with JD Edwards

Get More from the World's Largest JD Edwards Specialist

Reduced Cycle Time with Automated Accounts Payable Process

Today, more than ever, organizations strive to continually reduce costs and improve efficiencies. Quickly identifying areas of improvement is the key to any organization's success. The Accounts Payable (AP) Process is a good place to start because by nature, the AP process is often distributed and demands a chain of different approvals that generates huge volumes of paper and can be difficult to manage.

In Oracle JD Edwards, organizations have the ability to leverage their current investments, eliminate bottlenecks and automate the processing of invoices. With an integrated combination of Oracle products, like Oracle Document Capture, Oracle Forms Recognition, and Oracle Imaging and Process Management (I/PM), the Accounts Payable process becomes seamless. Cycle time is improved, resulting in a positive impact on the company's bottom line.

AP automation provides transparency and organization to the entire AP process which significantly reduces cycle time. Invoice review and approval is expedited by reducing manual data entry and providing quick access to important data.

KPIT helps companies to automate their Accounts Payable process by leveraging WebCenter Document Capture, WebCenter Forms Recognition, WebCenter Imaging and JD Edwards Adapter for WebCenter . It enables business users to easily access, view and initiate tasks on documents associated with transactions directly from within or outside the JD Edwards environment.

As the world's largest specialist in JD Edwards, KPIT has the right expertise and the deep experience to help customers leverage upon their accounts payable processes.
