

ELEVATESM for Oracle JD Edwards

Remain Perpetually Current on EnterpriseOne 9.2 in Oracle Cloud Infrastructure and Continue to Innovate

Realize the true potential of your JD Edwards application and stay current with updates made available by Oracle

KPIT's ELEVATESM ensures the rapid innovation of Oracle Cloud and JD Edwards EnterpriseOne 9.2 is quickly absorbed and enables technology as a competitive advantage. Stay perpetually current on E1 9.2 and drive maximum value from your IT investments with ELEVATESM.

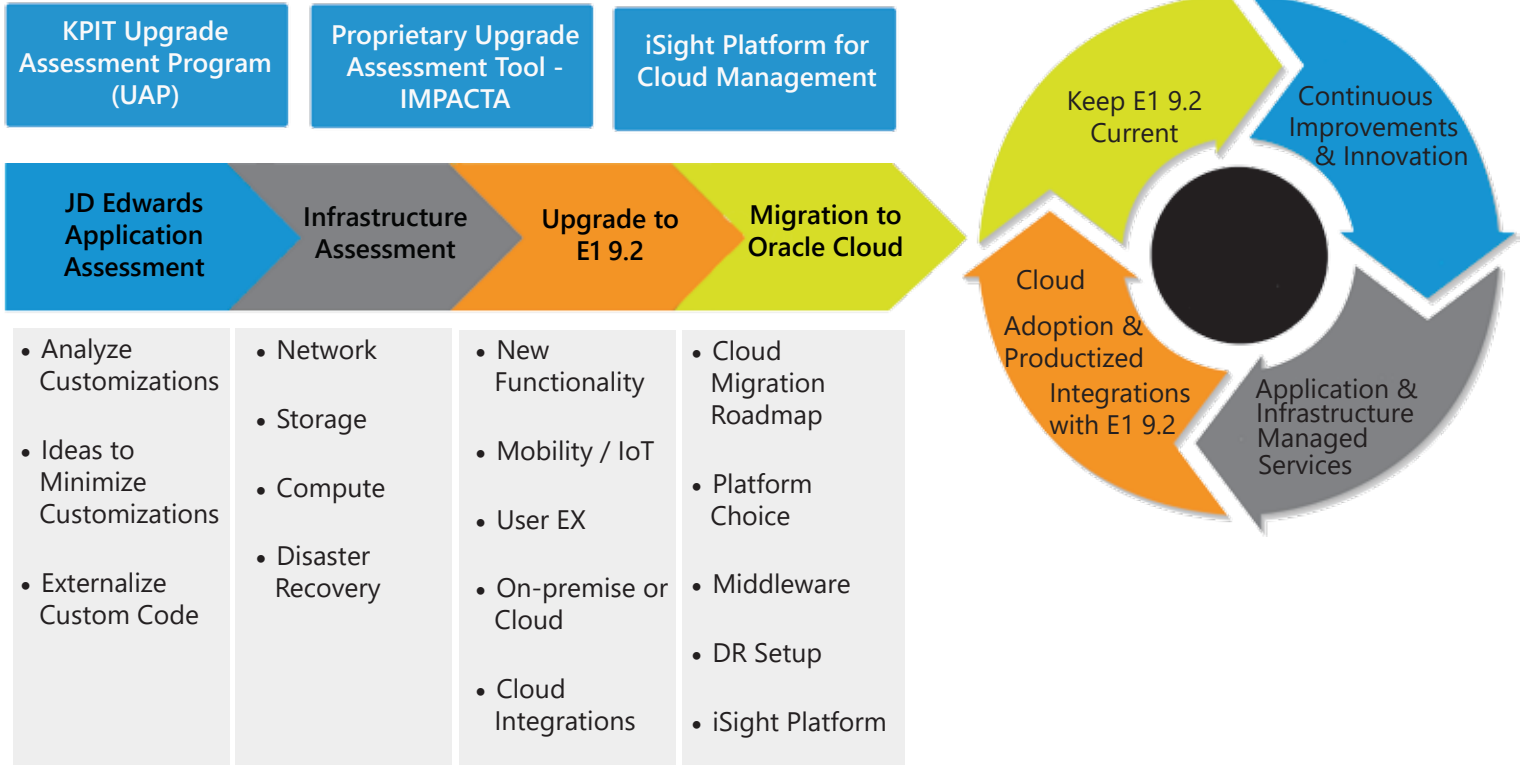

ELEVATESM Benefits

- **Innovation:** Two PoC's per year will bring start-up type culture and may help introduce game changers to the business model
- **Code Current:** Absorb innovation quickly and stay ahead of the competitive curve
- **SmartAMS:** Focus on business process improvements while day-to-day issues are effectively resolved
- **Fixed Fees:** Fixed monthly fees brings predictability to cost structure
- **Lower TCO:** Optimized set-of-services in combination with Oracle Cloud Infrastructure (OCI) can reduce five year TCO by at least 30%

KPIT's ELEVATESM for JD Edwards eliminates the complex technology layer while reducing the total cost of ownership, for a predictable fixed monthly price.

ELEVATESM Building Blocks

“With our continuous delivery model, we release product innovation and features in smaller updates on a more frequent basis. This allows our customers to achieve shorter time-to-value for their investments in Oracle JD Edwards, without the cost and disruption associated with a major upgrade cycle. We are pleased to see partner delivered service offerings that align with this strategy and help our customers take advantage of enhancements supporting digital transformation and cloud initiatives”
