# KPIT OnTrack™

*Integrated Real-Time Asset Monitoring System*

**KPIT**

## Connecting Possibilities, Driving Innovation

Companies need to ensure that dispatched products are safeguarded to the fullest possible extent until they reach the customer, and items should be traceable until the delivery is complete. However, there is often a concern whether every product is dispatched to the right location, every time, and that each vehicle involved in the process is tracked and monitored. Companies need a solution that can offer immediate and synchronized progress data in real-time.

**KPIT**, an Oracle Platinum Partner, brings you **OnTrack™** –a robust telematics solution that integrates commercial vehicles with communication and navigation electronics to solve all these challenges.

OnTrack™ provides **real-time GPS updates**, with instantaneous **remote diagnostics covering location information, engine and driver performance,** and **total mileage**. Along with this, the statistics gathered are available for future planning, meaning that not only are daily functional needs met, but all operations are streamlined. OnTrack™ is an intelligent solution that helps companies to –

- Better manage fuel consumption
- Reduce manual work
- Improve velocity and vehicle positioning
- Organize a fleet of vehicles efficiently
- Reduce overhead
- Increase fuel savings

## Tracking Assets, Improving Operative Management

- Vehicle Diagnostics
- Engine & Driver Performance

OnTrack™

- GPS Updates
- Mileage Analysis

= 

Better Operations for Mobile Organizations

Less Manual Work

+

Managed Fuel Consumption

+

Improved Velocity

GPS data collects location, speed, date, and time information

Processed data is sent over a GSM network

Customer specific updates track individual orders

## Features at a Glance

### Hardware

- GPS 65 Channel, with 2.5m accuracy
- GPRS Quad Band
- 9-30v DC Power Supply
- Inbuilt GPS/GPRS Antenna
- Internal Battery
- Ports –RS 232/RS 485/USB
- 4 Digital Inputs

### Software

- Online and offline tracking
- Google/GIS Map Support
- Remote vehicle diagnostics
- Online fuel monitoring
- CAN interface, with vehicle sensors

## Flexible Pricing Options

### Capex

- Hardware, Software and SIM are provided as a bundled package
- One time cost

### Opex

- Hardware, Software and SIM are provided as per usage and requirement
- Pay per use

### Combo Pack

- Hardware is provided at a one time cost
- Software and SIM are charged as per usage and requirement

## Mapping Innovation

OnTrack™ uses Google Maps and provides real-time photo and video visuals from anywhere in the world. Now you can monitor work progress onsite. OnTrack™ is most suitable for the following business:

- **Real-time Tracking of Fleets** –Pick-up and drop-off times and unsafe driving
- **Transport networks**– Efficiency and timeliness
- **Generators** – Real-time alerts and reports
- **Taxi systems**– Idling and unauthorized use
- **Heavy vehicles**– Productivity improvements
- **Police and Fire Brigades**– Effective coordination

> "We congratulate KPIT for their achievement, and their commitment and investment in Oracle products and the Oracle PartnerNetwork programs."
